

Online Yellow Belt

Business Improvement & Six Sigma Made Simple

Process Management International

Flexible learning that introduces the key concepts of Process Excellence

The PMI Online Yellow Belt is an accessible way to learn about the tools, method and benefits of business improvement and six sigma. Delivered in a modular online format, it is the ideal way to introduce and share knowledge of what's involved in a six sigma initiative. With its relaxed and engaging delivery style, the Online Yellow Belt plays out a fictitious business improvement case study in a "soap opera" setting, helping learners to gain familiarity with the tools, terminology and method without the need for formal classroom training. At the end of the 26 module series, learners are awarded a certificate of completion to recognise their "Yellow Belt" level of awareness.

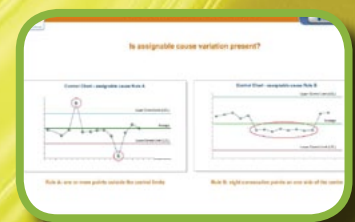

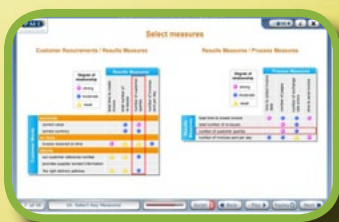

What's Covered?

An introduction to PMI's structured methodology for business improvement

Including:

- to learn how a process is performing: Flowcharts, Measures, Histograms, Control Charts, Capability
- to define a project: Chartering, Forming Teams and SIPOC
- for investigating Root causes: Cause/Effect, Pareto, Scatter Diagrams, 5 Whys
- to test and study potential solutions: Idea Generation, PDSA, Control Charts
- to implement improvements: Stakeholder Analysis, Skills Matrices, Gantt Charts
- to lock in improvements: Mistake-proofing, Standardisation

Scenes from the Series...

How it works

It's available on the web using our online learning system or offline using yours.
