## Lean and Six Sigma Training Solutions

### About PMI & CQI Public Training

Together, PMI and CQI operate the UK's leading Lean and Six Sigma public training business. PMI (Process Management International) has been at the forefront of business improvement consultancy and training for 25 years. In that time, we've served thousands of people worldwide and helped shape countless organisational and business improvement programmes. The CQI (Chartered Quality Institute) is the world's oldest quality body and a leading authority on progress and development. The power of our combined experience forms the essence of all our training programmes, enabling you to achieve rapid, effective and permanent results.

### Where do we operate?

Our programmes take place in London and the Midlands and delegates may choose the most suitable location. The London site is at CQI near Hyde Park Corner. The Midlands venue is at PMI's training centre near Birmingham International and the NEC. We also offer in-house training at any location around the world.

### What programmes are available?

We offer five distinct levels of training, guiding you through the entire Six Sigma process.

- **Introduction to Lean, Six Sigma and Business Improvement**

An interactive webinar, suitable for all. Key concepts will be explained and the benefits of Six Sigma and business improvement will be discussed. PMI's expert consultants will be online and able to chat about your improvement goals and answer any questions you may have.

- **Lean Six Sigma Green Belt Programme**

This two module programme teaches the best process improvement, lean and six sigma tools, methods, theory and application using the powerful PMI Improvement Cycle. This course is based on 25 years of PMI's experience and has a depth and breadth of content that can generate rapid return on investment and a potent organisation resource. Suitable for anyone looking to generate business improvements in areas such as customer satisfaction, service delivery, cost control, new product introduction and process performance to name but a few.

- **Six Sigma Black Belt Conversion Programme**

This course builds on previous Green Belt training and increases competence in variability reduction. Delegates will be equipped to promote and practise Six Sigma tools and techniques. The programme is split into two modules of five days each, with a month in between.

- **Six Sigma Black Belt Programme**

This four-week training programme (which includes a Green Belt component) develops delegates to lead the implementation of process improvement. They will serve as managers or internal consultants leading efforts on strategic projects. Participants will be equipped to promote and practice Six Sigma tools and techniques and to understand how process improvement will be accomplished.

- **Online Yellow Belt**

The online Yellow Belt e-Learning series is an easy way for you and your company to benefit from PMI's renowned process improvement and six sigma training programmes in an e-Learning format.

- **Lean Essentials Series**

Our Lean e-Learning course has been structured around the PMI Process Improvement Cycle providing the method to ensure sustainable improvements are made.

Trading terms: Prices stated exclude VAT and do not include accommodation or computer software packages. All prices are effective from 1 January 2008. Fees are payable 21 days prior to the commencement of the course and are subject to PMI's terms of business, published at [www.pmi.co.uk](http://www.pmi.co.uk).

When it comes to Lean and Six Sigma training, there's no substitute for quality
