

Introduction to lean six sigma and business improvement: 2 hour webinar

What's it all about?

Many people are not sure what to expect from lean six sigma. Rumours and speculation abound, the industry jargon and statistics can be baffling. CQI and PMI's introduction to lean six sigma and business improvement seminar is an interactive webinar that cuts through the confusion.

What are the benefits?

- **Quick and easy way to learn about lean six sigma and relate to your existing activities**
- **Access to PMI's expert consultants**
- **A chance to ask questions and get answers in real-time**
- **Allows you to assess if lean six sigma is for you or not**

Transforming goals into results

Outline

In this 2 hour webinar, PMI's expert consultants will explain key concepts and discuss examples of what lean six sigma and business improvement can help achieve. We promise not to bury you with jargon or bore you with screens full of text and theory. Our style is to use straightforward language, illustrate our explanations with plenty of animated graphics, and involve you using questions and chats. You'll be able to discuss your issues and improvement goals and we'll help you understand what will be useful to you. After the webinar, we'll send you a link so that you can view a recording of the event.

Who should participate?

This webinar is suitable for anyone who wants or needs to know more about lean six sigma and business improvement; from administrators in organisations that use lean six sigma through to top level managers who are considering lean six sigma or are interested in what it could do for them.

Practicalities

The planning for lean six sigma and business improvement webinar runs throughout the year (check www.pmi.co.uk for latest availability) and lasts for 2 hours. When you book a place, we'll send you login details so that you can join the webinar at the appointed time from your location.

The webinar is simulcast over the web via essential.genius connect. Delegates will need a computer with audio, a web browser, Adobe Flash Player and an Internet connection. The audio will be broadcast over your computer so you should have a headset or speakers. In order to participate fully and to get the most benefit from the webinar you should ideally have a headset with a microphone although this is not a necessity.
